

# Tic-Tac-Toe

## Program Description:

Create a program which allows the user to play multiple games of Tic-Tac-Toe. The program should tell who wins as well as give a running total of the number of wins a person has accumulated. The A goes towards whoever can create a better game (animation, graphics etc.)

## Rubric:

“B”

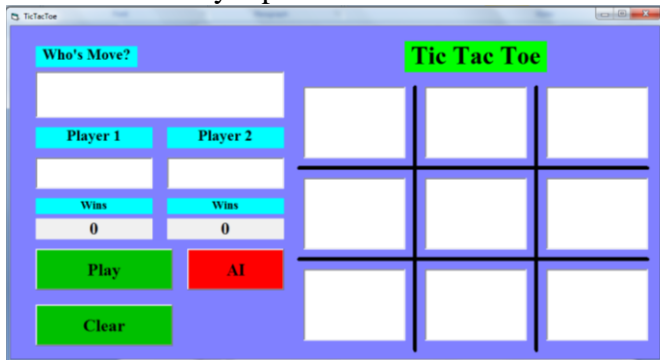

- running total      - who wins      - plays multiple games

“A”

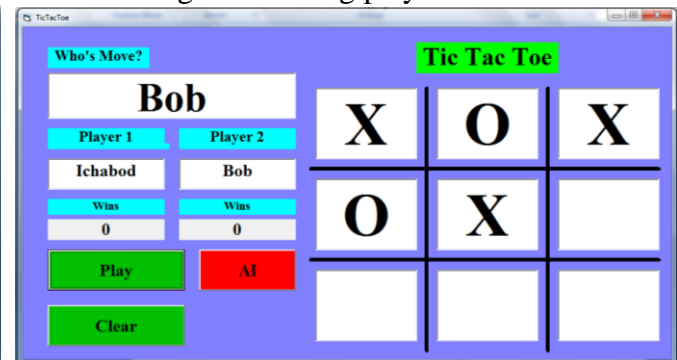

-properly Disable form      -ai      -animation; flashing lines      - graphics

## Sample output:

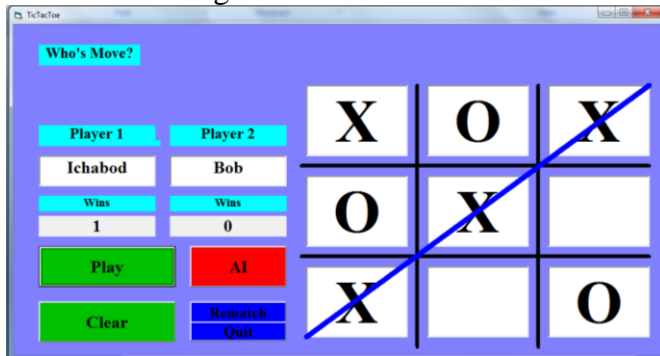

1. Gui before any input:

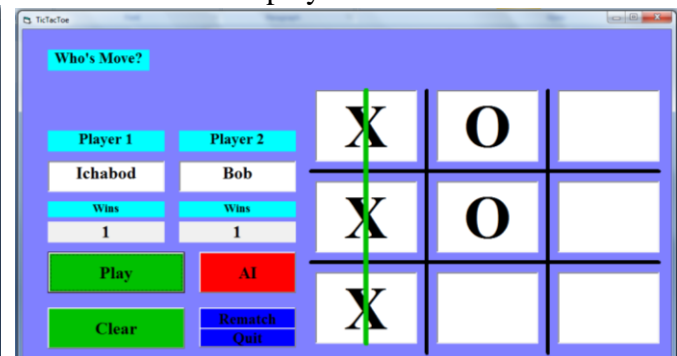

2. Gui while game is being played:

3. Gui at end of game:\*

4. Gui if rematch is played:\*

If clear is pressed the program should go back to the way it was in figure 1.

Notice that in figure 4 Ichabod's win is still kept

\* Who's move and Tic Tac Toe label boxes don't show because they are flashing when the game is played
